Email: d.sevostianova@innopolis.university

Context

👥 End-User

- Any person from Russia who wants to learn English
- Regularly, every day
- Without being overwhelmed by features
- Who wants to see progress

⚠️ Problem

- Standard apps require manual opening
- Overloaded with features
- No auto-reminders
- Motivation quickly drops

→ Irregular practice

💡 Product Idea

A Telegram bot and web app that sends 1 new English word with translation, example, and visual every day — without any extra effort.

Implementation

📦 Version 1 — Telegram Bot

- Python + python-telegram-bot
- Dictionary of 90 words with translation
- Daily Newsletter
- The "Next" button for additional words
- Saving progress (JSON)

🌐 Version 2 — Web App

- Beautiful dark UI with animations
- Auto-update every 3 minutes
- Countdown timer
- Learning progress bar
- Responsive design (mobile)

✅ **Addressed TA Feedback: Moved from Telegram bot → Web App • Simplified dependencies • Added beautiful UI • Auto-refresh mechanism**

Demo

Key Features Shown: Word display with emoji • Russian translation • Example sentence • Auto-refresh timer • Progress tracking
